**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with T.A Nguyen on 9/29/2008.

---Please cancel the following Claims 27-41.

***Election/Restrictions***

Claim 27-41 is canceled because it is drawn to a non-elected invention. The examiner has been given permission by applicant's representative T.A Nguyen on September 29, 2008 in a phone conversation to cancel Claims 27-41. Hence Claims 5, 11, 15-24, 27-41, and 44 are now canceled.

***Drawings***

Thirty-seven (37) sheets of drawings were filed on 7/24/2006 and have been accepted by the examiner.

***Specification***

Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification

***Allowable Subject Matter***

Claims 2-4, 6-10, 12-14, 25-26, 42-43, and 45-47 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art cited on the attached from PTO-892 and/or on the Information Disclosure Statement filed by the Applicant, is the most relevant prior art known, however, the invention of Claims 2-4, 6-10, 12-14, 25-26, 42-43, and 45-47 distinguishes over the prior art of record for the following reasons.

Claims 47 is drawn to a method of manufacturing an optical connector assembly wherein the method requires covering the substrate with a sacrificial cover plate to seal at least one optical fiber between the substrate and the sacrificial cover plate to provide an initial assembly, polishing a first end of said initial assembly at a predetermined angle to enable an optical coupling between said at least one optical fiber and at least one optical device using an optical reflection through a planar couple surface located on said initial assembly, and at least partially removing said sacrificial cover plate to expose at least a portion of said planar coupling surface of said initial assembly which allows said coupling.

The closest prior art of records belongs to Colgan (20040114859 US) and Jeong (6,757,471 US).

However Colgan does not teach wherein the initial assembly is polished at a predetermined angle, wherein the fibers are covered first (base on the order of the method steps in Claim 47) before cutting and polishing at angle. Further Colgan does not teach at least partially removing said sacrificial cover plate to expose at least a portion of said planar coupling surface of said initial assembly.

In regards to Jeong, the prior art to Jeong does not teach wherein partially removing said sacrificial cover plate to expose at least a portion of said planar coupling surface of said initial assembly.

Hence for the reason(s) above either alone or in combination the prior art above does not teach the method steps of Claim 47 as presented by the applicant. Claims 2-4, 6-10, 12-14, 25-26, 42-43, and 45-6 depends on Claim 47.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOANG TRAN whose telephone number is (571)272-5049. The examiner can normally be reached on 9:00AM - 5:00 PM.
